

7.83 HZ HOUSE

7.83 Hz House

masterplan for Byron Park using the 7.83Hz House

The design strikes a new profile due to both the logic of off-site construction and the volumetric configuration of spaces that allow natural ventilation, maximisation of daylight and the opportunity to reconfigure. 7.83 Hz will set standards in healthy living with construction materials selected to avoid nasty chemicals and their by-products.

The houses can easily be used for larger masterplans and can be arranged in numerous ways.

Client:	various
Construction value:	from £ 90 000
Structure:	solid wood board construction
